Protecting lives and power

I HOPE EVERYONE is off to a great New Year. Unfortunately, I need to address a relatively negative topic in my first column of the year—interfering with

the electric system. South Carolina's electric cooperatives are working with the General Assembly this legislative session to pass legislation to make the penalties for doing this much harsher. I want to explain why.

“Interference” can cover a range of issues, including entering our work zones, theft of materials, attempting to reconnect your own power and even threatening employees. I believe in the best of human nature, and I think people just do not realize the harm they could cause when they take such actions.

Regarding work zones, we simply need you to stay away. Electricity is hazardous when not handled properly, and so are poles, crossarms and the heavy equipment we use. To put things into perspective, I am an electrical engineer and have worked in the electric utility business for 25 years, and I still never enter one of our work zones unless I'm wearing the proper protective equipment and I have been given permission by the crew foreman. Members of the public are not going to have either of those things, so we just need you to stay clear. Even if your goal is to pay a compliment, please don't do it while the guys are working.

Theft is obviously wrong, but I believe the average thief has no idea how dangerous it is to steal from the utility system. People will occasionally see our ground conductors (on poles, equipment, substation fences, etc.) and think they have a quick way to get scrap value for the copper. First, we do not use copper

anymore—it's copper-clad steel which has no scrap value. Second, the system becomes very dangerous when not properly grounded. I have seen some terrible pictures of thieves who tried to cut the wrong conductor. Don't do it!

Reconnecting your own power (or attempting to) is illegal and can also kill you or others. Whether you have been disconnected for nonpayment or are out of power because of a storm or other outage, it is very dangerous to try to “fix” your own problem. Someone who sees a fuse hanging open might think, “All I need to do is close that, and I'll have lights.” Trust me, though, that fuse is open for a reason. Either the fault that blew the fuse is still on the line or someone is working downline of it. Do not, under any circumstances, try to restore your own power.

I feel certain that no one who reads this magazine needs to hear what I just wrote. All of us probably know someone, however, who needs to hear this, so please pass it on to them. Promise me you'll stay safe out there, and I'll promise my February column will be much more light-hearted!

Young artists shine

Christmas Card Contest highlights students' creativity

EVERY HOLIDAY SEASON, Santee Electric Cooperative loves giving local students a chance to show off their creativity in our Christmas card contest.

Open to 4th and 5th grade students across SEC's service territory, the contest celebrates the imagination and festive spirit of our community's youngest artists.

The 2025 entries were full of creativity and festive designs. After careful consideration, SEC announced five talented winners whose artwork captured the magic of the season:

- ▶ **Maggie McCrary**, 5th grade student of Lauren McCrary at Laurence Manning Academy.
- ▶ **Gracelynn Sanders**, 5th grade student of Lauren McCrary at Laurence Manning Academy.
- ▶ **Paislee McElveen**, 5th grade student of Jessie Welch at Walker Gamble Elementary School.
- ▶ **Heidi Poston**, 5th grade student of Britney Nobles at Scranton

Maggie McCrary and Gracelynn Sanders of Laurence Manning Academy.

Maggie McCrary's design.

Elementary STEAM Academy.

- ▶ **Leira Fivек**, 5th grade student of Kenley Thomas at Pleasant Hill Elementary STREAM Academy.

Gracelynn Sanders's design.

These young artists demonstrated incredible talent and creativity, making 2025's contest truly memorable.

Congratulations to Maggie, Gracelynn, Paislee, Heidi and Leira!

Paislee McElveen of Walker Gamble Elementary School.

Heidi Poston of Scranton Elementary STEAM Academy.

Leira Fivек of Pleasant Hill Elementary STREAM Academy.

Ready for an experience you won't forget?

Your co-op has two amazing trips planned this summer. Juniors: Apply for the Washington Youth Tour. Sophomores: Apply for the Cooperative Youth Summit.

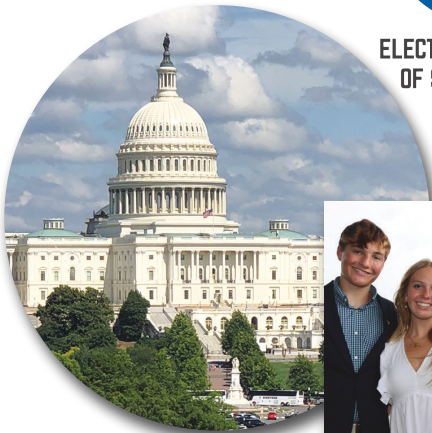

Juniors: Experience Washington, D.C., with hundreds of students from across South Carolina and the country, meeting lawmakers and touring all the sights. Your electric co-op will cover your round-trip plane ticket, tours and meals. In other words, it's all free!

Sophomores: Experience South Carolina's capital like never before. Tour the Statehouse, meet lawmakers and see how co-ops are preparing for our state's energy future. Plus, there's plenty of fun with visits to popular Columbia attractions like the South Carolina State Museum. Your electric co-op will cover all your expenses.

We've made it easy to apply for either FREE trip. Apply today!

ELECTRIC COOPERATIVES
OF SOUTH CAROLINA

Washington Youth Tour: June 14-19, 2026

Cooperative Youth Summit: July 13-16, 2026

Applications available: santee.org/youth
Application deadline: February 20, 2026

Congratulations, teachers!

SEC awards Bright Ideas grants

Santee Electric was proud to award 16 Bright Ideas grants ranging from \$500-\$1,000 to local teachers in our community.

Bright Ideas provides funding for innovative classroom-based projects. Santee Electric is committed to its core principle of Concern for Community. That's why we love being able to support local teachers who are doing important work in our communities. Santee Electric believes that

investing in our teachers and students is an investment in the future of our community, and we're proud to be a part of that effort.

Grants are available to all kindergarten through 12th grade teachers in Santee Electric's service territory. Each applicant is judged anonymously. There is no limit to creativity in the Bright Ideas grant, and there was a wide range of initiatives in the 2025 projects.

Teachers, be on the lookout for the Bright Ideas application opening in July. You could be a 2026 Bright Ideas Grant winner!
