

SANTEE ELECTRIC COOPERATIVE, INC.
LARGE POWER DEMAND SERVICE SCHEDULE HIGH LOAD FACTOR
LPD-21 HLF

S. C. 28 Williamsburg	Effective for bills rendered on and after November 1, 2020
-----------------------	--

AVAILABILITY

This Schedule is an economic development incentive rate and requires approval on a case by case basis. This rate is intended for use only when there is a demonstrable need in order to bring new electrical load, jobs, and investment to SEC territory. In those cases, it would be available for electric service to a non-residential consumer at a single point of delivery with transformer capacity equal to or greater than 125 KVA. This Schedule is not available for seasonal or standby service or for any contract period less than 5 years. This Schedule shall apply to non-residential commercial and industrial loads normally with a sustained average monthly load factor of sixty percent (60%) or greater.

TYPE OF SERVICE

The Cooperative will provide service at 60 hertz, single-phase 2 or 3 wires, or three-phase 3 or 4 wires, at our standard distribution voltages.

MONTHLY RATE

Monthly Facilities Charge	\$3.75/kW of Contract Demand (Updated Annually)
Demand Charge	
All KW of Metered Demand	\$15.95 per kW (Updated Annually)
Energy Charge	
All kWh	\$0.0510 per kWh (Subject to Adjustment Factor: Provision 4)

FACILITY CHARGE

Each year the Cooperative will use average system cost to update the charge per kW of contract demand for the monthly facility charge. The contract demand will be set in the contract and will be automatically ratcheted up if the measured kW demand after power factor adjustment exceeds the contract demand.

BILLING DEMAND

The Billing Demand shall be the maximum kW registered or computed during any 15-minutes from the Cooperative's metering facilities within the current monthly billing period. The demand charge per KW will be updated annually based on the Cooperative's wholesale power demand rates.

The consumer agrees to maintain unity power factor as nearly as practicable. Demand charges will be adjusted to correct for average power factors lower than 90%. This adjustment shall be made by increasing the measured demand 1% for each 1% by which the average power is less than 90% lagging.

SERVICE PROVISIONS

- 1) The charges computed at the above monthly rate shall be subject to applicable South Carolina Sales Tax, franchise fees, assessments, and surcharges imposed by any governmental authority.
- 2) The minimum Contract Period for service provided under this schedule shall be Five (5) years.
- 3) The minimum monthly charge under the above rate shall be the monthly facilities charge for all customers served under this rate schedule, except those customers for which a higher minimum monthly bill is required under the Cooperative's standard policy, because of special circumstances affecting the Cooperative's cost of rendering service.
- 4) The amount calculated at the above rate is subject to be adjusted monthly by the Cooperative's projected wholesale power cost. The rate shall be adjusted by a TIER (Times Interest Earned Ratio) adjustment factor to cover wholesale power cost changes and a rate necessary to maintain TIER as set forth by the mortgage agreements between the cooperative and its approved lending agencies.
- 5) Intermittent service connections and disconnections can be subject to an operating service charge of not less than \$30.00.
- 6) A contribution-in-aid of construction may be required in accordance with the Cooperative's line extension policy or to provide additional capacity adequate to serve abnormal electrical load.
- 7) Bills are due upon receipt. Bills are delinquent 22 days from the Billing Date and subject to a late payment charge on the current bill equal to ten percent (10%) of the first \$25 and an additional two percent (2%) thereafter. Those unpaid after 30 days are subject to service disconnection.
- 8) The Cooperative's facilities used to provide electrical service have definite capacity limitations and can be damaged by overloads. Therefore, the Consumer must notify the Cooperative prior to making alterations to the service entrance equipment so that facilities of proper capacity may be provided. The Consumer shall be responsible for all expenses and or damages to Consumer's facilities resulting from failure to give proper notice. The Consumer may also be subject to a contribution-in-aid of construction for work required to meet the Consumer's alterations. The Consumer should contact the Cooperative for information concerning charges for such work.
- 9) Temporary service or construction service shall be supplied at a single point of delivery and in accordance with the Cooperative's Line Extension Plan.
- 10) Service under this schedule is subject to the provisions of the Cooperative's Service Rules and Regulations.

Effective for bills rendered on and after November 1, 2020
